## GOODS MADE: BY INDUSTRIES.

[In the instructions accompanying the schedule upon which the returns were made that supply the information contained in this presentation, the manufacturers were called upon to give the most complete detail as regarded goods made and work done, and were requested not to use such unmeaning designations as "sundries," "miscellaneous," "other articles," etc. The only condensation made in the original returns has been to combine, so far as practicable, those general lines which mentioned two or more kinds of goods made without specification of the quantity and value of each article manufactured. The order is alphabetical with subsidiary classifications under such general titles as "Rakes," "Guns," "Artificial teeth," etc. The quantities and values given are State totals of the goods made and work done in each industry. Reference should be made to the "ANALYSIS" for a description of the method of classification under industry heads.]

### AGRICULTURAL IMPLEMENTS.

| ARTICLES, ETC.                                                                 | Basis  | Quantity | Value     |
